

As you come in...

Think about a moment from 2020–2022 when
learning either
worked surprisingly well or **completely fell
apart**

We'll start there.

Only look at the QR code if you are so
totally over thinking about this prompt

Relationships First, Then AI

What the Pandemic Taught Me About Teaching in the AI Era

AI literacy begins with the conditions learning requires

What made learning work—or fall apart?

During 2020–2022...

What made learning **work**?

What made it **break**?

Relationships

Trust

Belonging

Structure

Learning depends on...

Relationships

Trust

Community

These are not extras. They are preconditions.

Do not automate intrinsic reward

Intrinsic reward = the satisfaction that comes from doing the hard work of learning

AI as Support

Extends effort

Supports thinking

Builds confidence

Deepens relationships

AI as Substitution

Replaces effort

Short-circuits thinking

Undermines confidence

Bypasses relationships

Substitution feels efficient. Support builds capacity.

Relationships First → AI Literacies

The Eight Dimensions of AI Literacies

Relational Foundations

Cultural
Communicative
Civic

Motivation & Agency

Confident
Creative

Thinking & Evaluation

Cognitive
Critical
Constructive

Discussion

- Where is AI supporting learning well?
- Where might it be substituting for it?
- What should we stop automating?

What changes now?

What might you **stop automating** as a result of this?

AI literacy is not just a skill set. It's a social achievement.
